Risk Response **strategies** for each scenario:

1. **Use of immature technology** - *Use a different software to avoid this problem that is similar or fix the issue after assessing the various options*
2. **Limited participation of customers in Req. Elicitation** - Request this in a legal way that addresses the requirement of communication in a contract
3. **Team change** - *Transfer knowledge to new team through documentation*
4. **Limited experience of project managers** - *Ensure that the project manager has the proper experience prior to getting hired or hire a new project manager with more experience*
